

MyGradeBook READ ME

Installation

- Installing this program is easy.
- Just double click the MyGradeBook.exe and the program will create a folder named MyGradeBook Data (both shown in yellow bellow).
- This is where all your information is saved. In order to access it later both the MyGradeBook.exe and MyGradeBook Data folder must be within the same folder.
- So long as they are both together, this program can run on any Windows computer that supports the .NET framework 4.5.

Additional Information

- If you want more information about the program click the label in the bottom right corner (shown below in green).
- For contact information and location of latest version click the About Us (shown below in blue).
